

AMMUNITION SHIPPING AND STORAGE
CONTAINER AND METHOD

5 ABSTRACT OF THE DISCLOSURE

10 A container system and method for shipping and
storing an item is provided. The container system may
comprise a storage vessel with an interior compartment,
and an access opening at one end. A removable end cap
may be releasably and mechanically coupled to the storage
vessel at the access opening, fully enclosing the access
opening. Mechanical fasteners may also be secured to the
storage vessel and removable end cap to form the
15 releasable, mechanical connection. In one embodiment, at
least one stacking lug may be provided at the perimeter
of the storage vessel. In another embodiment, the
container may comprise a pressure vessel, which may be
adapted to receive a round of ammunition
